Livestock Production Rules	
6.7.3. Use of non-organic animals	
Non-organically reared pullets for egg production of not more than 18 weeks may be brought into an organic livestock unit until 31 December 2014, when organically reared pullets are not available and provided that the relevant provisions related to feeding and disease prevention and treatment are complied with.	Non-organically reared pullets for egg production of not more than 18 weeks may be brought into an organic livestock unit until 31 December 2017, when organically reared pullets are not available and provided that the relevant provisions related to feeding and disease prevention and treatment are complied with.
6.7.21 Use of non-organic protein feed of plant and animal origin for livestock	
The use of a limited proportion of nonorganic feed of plant and animal origin is allowed for porcine and poultry species where farmers are unable to obtain feed exclusively from organic production. The maximum percentage of non-organic feed authorised per period of 12 shall be: 5 % for the calendar years of 2012, 2013 and 2014 . The figures shall be calculated annually as a percentage of the dry matter of feed from agricultural origin. The operator shall keep documentary evidence of the need for the use of this provision.
